

Ballast. There's more to the story.

**See the smiles?
Notice the length of the wave?
Check out that profile!**

All created with the normal factory ballast.

That's Centurion National Sales
Manager Bryan Holland with his kids.

He's got a stock Enzo 240 with the
standard ballast system. At the time
this picture was taken, there were 4
people in the boat with just 500
pounds of ballast. Yes, impressive.

We would never consider anything but Centurion, no other builder even comes close. Competitors far and wide know that Centurion produces the best wave. We recently produced one of the largest wake surfing events ever held and Centurion proved why they own wake surfing. Todd Gaughan- Texas Outlaws Owner

Synonymous with wake surfing, Centurion is the undisputed leader. It's no wonder that every significant wake surfing event in North America in 2009 was produced with Centurion boats. That's huge!

It's in the details. Centurion's proprietary hull technology. The running gear. The proper set up. There's a unique Centurion synergy that's creating the benchmark for wake surfing.

What's to know?

1. Everyone can enjoy wake surfing, it's easy and fun.
2. Centurion's standard set up delivers world class performance.
3. Massive ballast is unnecessary, wastefully consumes more fuel and it's hard on the boat. Centurion delivers more with less fuel, greater efficiency and less wear.
4. There's a reason every key wake surfing event uses Centurion. It's the best.
